RFID Container Bolt Seals

RFID Container Cable Seals

RFID Seals

The E-seal is a Radio Frequency device that transmits container information to a RFID portal or mobile reader.

Strip Seals - NFC (ENOS SP-22)

Container Bolt Seal

The Container Bolt Seal locking mechanism is embedded in a groove in the metal bush, making the seals stronger and more difficult to tamper. Typical applications of the Container Bolt Lock include shipping and intermodal containers. The Container Bolt Lock is also widely used for ground transportation. Container Bolt Seals come with logo and serial numbers, and are tamper evident. Customisation options include colour, logo and serial number printing.

Bolt Seal
